Data Flow Diagram

The diagram below illustrates how data moves through the Personalized Networking Assistant system - between the User, Streamlit Web App, FastAPI Backend Service, ML zero-shot classifier, GPT-2 Generator, and Wikipedia API.

Symbol	Name	Description
Oval / Rounded	External Entity	User (Event Attendee) who inputs bio, event descriptions, and interests.
Rectangle with header	Process	1. Zero-shot Theme Extraction, 2. GPT-2 Starters Generation, 3. Wikipedia API Lookup.
Rectangle (solid fill)	Data Store	history.json and feedback.json files.
Labeled Arrow	Data Flow	Movement of JSON payloads, API requests/responses, and logs.
